First Aid:
If swallowed: Call a POISON CENTRE, doctor, physician or first aider.
If on skin: Wash with plenty of water.
If in eyes: Remove contact lenses if present and easy to do so. Continue rinsing. If eye irritation persists: Get medical advice or attention.
IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. If exposed or suspected of medical advice or attention. If medical advice is required: Have product container or label on hand. Further information can be obtained from Resene Help Line 0800 737 363 or from the Resene Help Line 1000 737 363.

Preparation:
- If the surface is in poor condition (e.g. paint blistering, peeling or flaking) see Resene Paints Limited for advice.
- Paint must be applied to a substrate that is dry, sound and free from dust, dirt, oil, grease or other foreign material. If the surface is in poor condition, it may be necessary to use a Resene Rust Blocker before applying Design Pine Primer.
- Resene Rust Blocker should be allowed to dry for 4-6 weeks before applying Design Pine Primer. Resene Rust Blocker is designed for use on old, rusted and rusted steel and aluminium surfaces.

Stirring and Mixing:
Before use:
Stir well with a wide flat stirrer. Before use:
Stir well with a wide flat stirrer. Do not use a hand mixer. Once mixed, the paint must be used immediately. Design Pine Primer is best overcoated within 6 weeks of installation for optimum finish results. Design Pine Primer has been formulated for use on a wide variety of building surfaces including NZ Standard 1263.13 - 1991 Standard. Resene does not accept any responsibility for the application of incorrect product to substrate or the application of incorrect colours. For further painting advice and information, call the Resene Help Line 0800 737 363.

Safety Data Sheet is consulted prior to application.
