**Resene Earthsense Ceiling Paint**

Resene Earthsense Ceiling Paint is a waterborne alkyl flat ceiling paint formulated with a special renewable extender pigment to achieve a non-toxic, low odour finish. It is the same as selected. When using multiple packs of this product in every case it is recommended that the appropriate data sheet are consulted prior to application. The spreading rate recommended for this product is 1.4 m²/Litre.

**Application**

- **Apply with a low nap roller or brush**. If you apply too thick, you may achieve cracking or peeling. The application of an oil or water-based primer is recommended. Use on exterior flat surfaces. Application is suitable for use on the following: Outdoor flat surfaces.

**Cleaning and Maintenance**

- **Washing** is not recommended. If cleaning is required, allow the paint to cure at least one week before cleaning. Do not allow water on this product as condensation is highly likely to form on the surface.

**Water Resistant**

- **Waterproof** to a low degree. This product contains resins and emulsions that allow water to penetrate the paint film and can reduce the risk of water damage. Resene Earthsense Ceiling Paint is not intended for use in bathrooms or shower areas.

**Environmental Information**

- **Resene Earthsense Ceiling Paint is not designed for weathering or exterior application**. Resene Sureseal (low data Sheet D38242) or Resene Sureseal (low data Sheet D408) if required when choosing of coatings to be understood.
