Resene Enamaloy is a gloss waterborne enamel that may be used in all areas traditionally reserved for enamelled enamel. Non-polluting and fast drying with easy water clean up.

Preparation
Color selections to be created in air conditioned studio. dry free of dust, loose material, (including mineral oil based wood finishers or sealants) and dirt. Remove accumulated contaminants and prepare the surface according to Resene's 2-Step Preparation Method (see Data Sheet D312). Surface is best primed with Resene Sureseal - see Data Sheet D809. Emulsion must be treated before using (see Data Sheet D661). Use Primers or sealers as specified. A water based primer such as Resene Sureseal is suitable for most substrates.

All surface dusts must be handled and appropriate protection must be considered to avoid leaks from base coats to prepared substrates or old building materials containing asbestos must be injuries to be health issues if the product is exposed to asbestos dust as this material is suspect.

For new work ensure the surface is sanded to a smooth finish and dusted off. Roll all sharp edges. Ensure the surface is dry before painting.

For repaints thoroughly sand and wash to remove all signs of surface contamination. Ensure the surface is dry before painting.

Use Resene Sureseal (see Data Sheet D809) before painting. Undercoated surfaces can cause skin irritation and cause several applications of a primer. If required thoroughly sand and wash to remove all signs of surface contamination. Ensure binding agent is present in the surface as shiny streaks. This does not harm the paint. To ensure your bathroom/laundry - the bathroom/laundry system when painting in marginal painting conditions. Do not use gas or diesel heating systems in the bathroom. Temperature must be maintained at least 10°C above the ambient temperature to ensure a smooth finish when applying to trim and joinery. In hot conditions may be thinned with up to 10% water.

Resene CoolColour and Resene Enamaloy CoolColour are available to help reduce heat related impacts on the substrate. They are designed to be used as a system for optimal results. Substitution or mixing with other paint systems is not recommended. Read label before use.

SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. This product contains materials which may be harmful if swallowed or inhaled. Contact your doctor in case of vomiting. Ensure that the area is well ventilated with a good flow of fresh air.

RECOMMENDATIONS
Resene PaintWise (NZ) or paintback. Do not discharge any paint into the environment. Resene PaintWise (NZ) or paintback.
