Resene FX Metallic is an attractive waterborne metallic finish available in a wide range of exterior and interior colours. Whether used in isolation or as an accent over another Resene finish, it will enhance the appearance of any surface. Resene FX Metallic is recommended for exterior use, and is best used over a Resene Lumbersider or Resene Undercoat basecoat. It is available in a wide range of metallic finishes that are suitable for exterior use.

Preparation

- Ensure the intended surface is free of dust, dirt, grease, oil, water, algae, efflorescence and any other contamination. Ensure the surface is dry before painting.
- Fill cracks and holes with an appropriate filler after priming.
