Resene Hi-Glo CoolColour™ is a unique on a 100% acrylic emulsion for ease of application and maximum life over primer treated exterior flat, semi-gloss, and plastic surfaces. It is tailored to suit any building or external environment. Resene CoolColour is a zero VOC and paint technology that provides a zero VOC application and balanced thermal performance. The low VOC content means that, if the surface area to be painted is extensive, the effect on the environment would be minimal. The paint has been tested to ensure that it is suitable for use in direct contact with food. Resene CoolColour technology performs excellently on dark colours and the ultra-reflective properties on light colours are the maximum possible for heat build-up.

**Preparation**
- **Refinish bare areas with an appropriate primer**. For further information, contact Resene ColorShop or the Resene website.
- **New timber – apply one coat of Resene Wood Primer or Resene SureSeal (see Data Sheet D42).**
- **Sealants – special coating requirements of construction sealants may apply.** See the Resene Caring for your paint finish brochure or the Resene website for more information.
- **Priming**
  - **Resene Hi-Glo CoolColour must be used with a primer coat of either Resene SureSeal** (see Data Sheet D42) immediately before the Resene Hi-Glo CoolColour is applied (see Table D31B).
  - **Resene SureSeal is not recommended for use over areas of galvanised or Zincalume.**
  - **Apply coating in accordance with Data Sheet D812.**

**Application**
- **Resene Hi-Glo CoolColour in a wide range of metallic pigments providing a variety of surfaces.**
- **Application method**
  - **Apply long, even brushstrokes or roller.**
  - **Use an appropriate pressure technique**.
  - **Application of a Resene CoolColour will reflect more of the sun's energy than a standard colour, providing a choice of coating temperatures, reducing heat build-up and stress on the coating, substrate and building envelope.**

**Thinning and clean up**
- **100% waterborne gloss**
  - **Resin: 500 mL, water: 1500 mL**
  - **the reaction is exothermic, sufficient time must be allowed and heat must be avoided.**
  - **do not apply at night, in extreme heat, or in high winds.**

**Clean up**
- **Before application, remove any oil or grease from the surface.**
- **Wear appropriate protective clothing.**
- **Absorb with sand or sawdust, if possible.**
- **Thickly applied paint may require the use of an overnight sanding operation, followed by water spraying.**

**Cleaning Paint Equipment**
- **Brush out as much paint as possible into a container before scraping, and clean brushes.**
- **Dispose of excess water-based paints into treated desalination waste tank at your local council.**
- **Do not dispose of paints into heath or stormwater systems.**

**Safeguarding**
- **Keep out of reach of children.**
- **Ensure that use of this product is compatible with the substrate and the environment.**
- **Read all directions carefully before use.**
- **Check with Resene staff whether a Resene Total Colour System, or one of the selected Resene Total Colour Systems, is appropriate for your project.**

**SAFETY PRECAUTIONS**
- **Full list before use.**
- **Keep out of reach of children.**
- **Wear appropriate protective clothing.**
- **Avoid skin contact and avoid inhaling fumes.**
- **(Inhaling, eyes, or skin contact may cause irritation.)**

**Compatibility**
- **Do not discharge any paint into the environment.**
- **Do not mix with or substitute other materials.**
- **Do not mix with or substitute other materials.**
- **Under no circumstances should Resene Resene Quick Dry white (see Data Sheet D45) and Resene Hi-Glo CoolColour be used together.**
- **The use of lead or chromate based paints or old building materials is suspected.**
- **Consult your Resene ColorShop or Reseller for technical advice.**

- **AUST: POISONS INFORMATION CENTRE 131 126.**

**Precautions**
- **FIRST AID**
  - **Eye:** Rinse cautiously with water for several minutes. Call a POISON CENTRE, doctor or emergency services.
  - **IF IN EYES: Rinse cautiously with water for several minutes. Call a POISON CENTRE, doctor or emergency services.
  - **IF ON SKIN:** Rinse skin with plenty of soap and water. Call a POISON CENTRE, doctor or emergency services.
  - **IF SWALLOWED:** Rinse mouth. Call a POISON CENTRE, doctor or emergency services.

**Further Reading**
- **For full technical instructions see Data Sheet D31C.**
- **For use as a decorative/protective coating.**
- **or call Resene 0800 737 363.**
- **or call Resene 1800 738 383.**

- **Further information can be obtained from.**
- **When seeking medical advice take this container with you.**
- **If exposed or concerned get medical attention.**

**Spills:**
- **Do not touch spill.**
- **Wear appropriate protective clothing.**
- **Absorb with sand or sawdust, if possible.**
- **Thickly applied paint may require the use of an overnight sanding operation, followed by water spraying.**

**Paint Prep and Housewash**
- **Resene SureSeal (see Data Sheet D42).**
- **Resene Moss & Mould Killer (see Data Sheet D48).**
- **Resene Hi-Glo CoolColour will reflect more of the sun's energy than a standard colour, providing a variety of surfaces.**
- **Resene Total Colour System or such similar finishes or similar.**
- **Resene Quick Dry white (see Data Sheet D45) or Resene Galvo-Prime.**
- **Resene Hi-Glo CoolColour must be used with a primer coat of either Resene SureSeal** (see Data Sheet D42) immediately before the Resene Hi-Glo CoolColour is applied (see Table D31B).
