SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. This material is quite bland; with vapour, occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact may, and any eye contact will, cause irritation.

PRECAUTIONS
USE WITH ADEQUATE VENTILATION. DO NOT EAT, DRINK OR SMOKE WHILE USING.

Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from foodstuffs, either between 15°C-20°C or at a cool, constant temperature. Dispose of empty container safely. Consult Resene checklist on environmentally acceptable methods of cleaning equipment and disposing of unwanted paint. Do not contaminate any water supply.

FIRST AID
IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell.
IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation or rash occurs: Get medical advice or attention.
IF IN EYES: Rinse cautiously with water for several minutes. Continue rinsing. If eye irritation persists: Get medical advice or attention.
IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. When seeking medical advice take this container with you.

Resene Hot Weather Additive is specially formulated to retard the dry of Resene waterborne paints including Resene Paint Effects Medium.

- Warm, dry conditions and hot surfaces result in too rapid drying of waterborne paints. This may lead to excessive foaming on application and generally poor application properties such as short wet edge times and impaired levelling.
- Resene Hot Weather Additive additions of 2%-5% will generally improve most application problems caused by too rapid drying. In more severe cases more Resene Hot Weather Additive is beneficial. Do not use more than 10% (400ml per 4 litres). Do not use with Resene Brushing Additive.
- Caution: Higher levels of Resene Hot Weather Additive can reduce film build properties. This may show up as a tendency to run and sag and may make it harder to achieve recommended spreading rates.
- Normal recommended dosages of Resene Hot Weather Additive are as per the table below. One capful = 10ml.

<table>
<thead>
<tr>
