Lumbersider CoolColour™
waterborne low sheen
exterior

Revase Lumberjoint is a waterborne low sheen finish based on a tough 100% acrylic resin to ensure maximum durability in extreme conditions. It is the ideal finish for new joinery to look clean and fresh with the best of the natural wood look - but fully washable.

Properties
• More economical than traditional oil-based systems
• Better performance in extreme conditions
• Various finishes - Satin, Waterborne Satin, and Gloss
• Low sheen in the wet look finish
• 100% acrylic resin
• All resins and binders are fast drying

Recommended applications
• Priming
• Interior and exterior

Primers
• Priming
• Small cracks or imperfections

Coverage
• 12 square metres per litre per coat. The spreading rate can be increased by thinning with water.

Primer required:
• Yes

Application
• Brush, speed brush, roller or spray.

Touch dry time:
• 45 minutes

Usual number of coats:
• Two coats for most colours. Increased spreading rates can be achieved by thinning with water.

Quick check

SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. This material is not a foodstuff and is not intended for consumption. May cause skin irritation. Avoid eye and skin contact. Harmful to aquatic life with long lasting effects.

PRECAUTIONS
• Do not add accelerators or retarders. Do not add water during application.
• Except where stated, all resins and binders are fast drying.
• Do not dilute with water for the final coat.

First Aid
• For SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell.
• If IN EYES: Rinse cautiously with water for several minutes. If eye irritation persists get medical advice or attention.
• If INHALED: Remove to fresh air. If not better get medical advice or attention.
• If ON SKIN (or hair): Rinse skin with plenty of soap and water.

Disposal:
• Do not allow to enter drains or to run off into waterways. Refer to local waste management authority. This product contains inhibitors and is not suitable to be used as a standard sealer. It is a waterborne product and not anticipated to be harmful to aquatic life. However, it may be injurious to fish in local waterways.

Disposal:
• Wherever oil and grease are present and when painting galvanised steel or Zincalume, ensure the surface to be painted is thoroughly cleaned using Resene Housewash (see Data Sheet D813).
• Efflorescence on masonry or old building materials containing asbestos may be injurious to health. These materials are suspected.
• If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80).
• Wherever oil and grease are present and when painting galvanised steel or Zincalume, ensure the surface to be painted is thoroughly cleaned using Resene Housewash (see Data Sheet D813).
