Resene Masonry Flat is a premium quality, self-smoothing exterior waterborne coating designed for direct application to porous masonry surfaces. It imports a unique and even mortar-like touch with very light reflective effect.

Application

- Stir well with a wide flat stirrer. Do not allow to set up before use.
- Do not apply if rains, snow, frost or high humidity are expected. Do not apply under conditions of strong wind or rain. Do not apply under temperatures below 10°C or when temperatures are liable to change rapidly.
- Thinning and clean up: Use on premium paints. See your Resene

Use on:

- New and weathered surfaces. With one coat of Resene Masonry Flat (See Data Sheet D201), is the best surface preparation method for application of Resene Concrete Primer. Use on fresh cement render, apply one coat of Resene Emulsifiable Solvent Cleaner (See Data Sheet D804) then rinse clean with water.
- New and weathered masonry surfaces. With one coat of Resene Masonry Flat (See Data Sheet D201), is the best surface preparation method for application of Resene Concrete Primer.
