This document contains information on Resene FX Pearl Shimmer, a waterborne pearlescent glaze designed to give a wide variety of finishes to waterborne paints. Here is a summary of the information provided:

**Resene FX Pearl Shimmer**
- A decorative/protective coating for use as an exterior or interior finish.
- Suitable for application onto a wide variety of surfaces.
- Provides a soft shimmer effect to the surface.
- Ideal for use in critical lighting areas or where a monolithic finish is recommended.
- Not recommended for use on metal or plastic surfaces.

**Technical Specifications**
- **Net Contents**: 1 litre
- **Interference Included**: Yes
- **Solvent**: Water
- **Drying**:
  - **Dry Time (minimum)**: 4 hours
  - **Drying Time (maximum)**: 4 days
- **Appearance**: Pearlescent
- **Uses**:
  - On various surfaces such as walls, ceilings, and roofs.
- **Washing**: Clean up with Resene P
clean. Thinning: 1 part resin to 4 parts water.

**Safety Precautions**
- **First Aid**:
  - If swallowed: Rinse mouth. Call a Poison Centre, 0800 738 383 (AUST) or 0800 737 363 (NZ).
  - If in eyes: Rinse cautiously with water for several minutes. Get medical advice/attention.
  - If on skin: Rinse skin with plenty of soap and water. Get medical advice/attention.

**Preparation**
- Use Resene Broadwall Surface Prep & Seal to promote a stable, dust-free surface without sanding for a weekend.

**Painting Equipment**
- Use a tungsten filament light source or a LED panel for a better match.

**Cleaning**
- Clean up with Resene P
clean. Thinning: 1 part resin to 4 parts water.

**Further Information**
- For more information, visit the Resene website: www.resene.com.au

**Resene FX Pearl Shimmer**

**Usage**
- This product is intended for use as a decorative/protective coating. It is not intended for use as a primer or undercoat. Do not use undercured gypsum based stoppings.
- Some ‘soft’ plasterboard preparatory products and undercoated gypsum based stoppings may not be suitable for painting under stroked conditions.
- For use as a decorative topcoat only. Do not apply undercured gypsum based stoppings as the surface may be unsound or uneven.

**Mixing**
- Thoroughly mix the paint using a wide flat stirrer.

**Cleaning**
- Clean up with Resene P
clean.

**Storage**
- Store in original or correctly labelled container, tightly closed, in a well ventilated area, away from foodstuffs, either between 15˚C-20˚C or at a cool, dry, dark site. Dispose of empty containers safely. Consult Resene on environmentally compatible methods for the disposal of unpainted waste. Resene Advice will advise on the use of this material.
