Resene Qristal Clear polyurethane

Interior

Resene Qristal Clear is a range of hardwearing single pack polyurethane. Designed using the most modern technology to enable ease of application and maximum UV protection. Resene Qristal Clear produces a low sheen finish with excellent grain filling and sanding properties. Resene Poly-Gloss is an extremely hardwearing high gloss finish with excellent sanding properties. Resene Poly-Satin is an extremely hardwearing satiny sheen finish, matched to the required colour. Available in Resene Poly-Satin, or the full gloss Resene Polythane (see Data Sheet D53) for Resene Poly-Gloss.

Preparation
• Surfaces to be completely dust free and dry. Varnish clean to remove dirt, dust and loose material.
• Surfaces must be completely dust free and dry. Vacuum clean to remove dirt, dust and loose material.
• Surfaces must be completely dust free and dry. Vacuum clean to remove dirt, dust and loose material.

Application
• Usual number of coats: 2.
• Dry time (minimum): 5 hours. Drying is slowed by low temperatures and high humidity. Do not apply under damp conditions.

Primer:
• If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D53) for Resene Poly-Gloss.

Coverage
• Coverage: 18 square metres per litre per coat.

Use before:
• Stain timber with Resene Colorwood Satin. Refer to your Resene ColorShop or the Resene website for a copy.

Before use:
• The user accepts all responsibility for the finished result and for ensuring that the product is correctly used and applied. Before use, the user must ensure that the product is compatible with the substrate and surface preparation method and that the environment is suitable. The user must ensure that all safety precautions are followed.

Note:
Do not use on exterior timber surfaces.

Poly-Flat: a low sheen finish.

Poly-Satin: an extremely hardwearing semi-gloss finish.

Poly-Gloss: an extremely hardwearing high gloss finish.

Satin: a low sheen wax-like finish with excellent sanding properties. Resene Poly-Gloss produces a low sheen finish with excellent grain filling and sanding properties. Resene Poly-Satin is an extremely hardwearing satiny sheen finish, matched to the required colour. Available in Resene Poly-Satin, or the full gloss Resene Polythane (see Data Sheet D53) for Resene Poly-Gloss.

Quick check

Dry time (minimum): 4 hours. Drying is slowed by low temperatures and high humidity. Do not apply under damp conditions.

Recycle (time minimum): 12 hours.

Primer required: Dependent on surface. Usual number of coats: Three.

Application method: Brush, synthetic fibre roller or spray.

Thinning and clean up: Resene Thinner No.2 (formerly known as Resene Brush Cleaner or mineral turps). Do not allow mineral turps or other solvents to enter drains or to run off into waterways. Refer to local waste management authority. Do not use any gas or diesel burners to heat coated areas as these produce fumes which will inhibit drying and curing. Poor ventilation may affect appearance and performance.
