**Safety Precautions**

Read label before use. Keep out of reach of children. This material is water-based with occasional soap-like smell and even minor ingestion may have negligible effect. Read skin contact may and, in any case contact, cause irritation.

**Precautions**

- Do not use with Resene Wintergrade Additive.
- For full technical instructions see Data Sheet D320.
- Keep out of reach of children.
- AUST: POISONS INFORMATION CENTRE 131 126 or call Resene 1800 738 383.

**Fire and Health**

- Place in a well ventilated position, well away from heat sources.
-Dispose of wash-up water into grassy/unsealed area or sand or earth. Collect and seal in properly labelled drums. Do not discharge any paint into the environment.
- Do not use as a substitute for water-based materials or to speed up the drying of water-based paints. Do not use as a substitute for water-based materials or to speed up the drying of water-based paints.

**Further Information**

- For use as a decorative/protective coating.
- Keep cool at all times.
- Touch dry at 48 hours at 15°C. Allow to dry in a dry environment. Do not apply under damp conditions.
- For use as a system for optimal results. Substitution may cause substandard performance.
- For best results apply a full coat of Resene Quick Dry prior to application of topcoats.
- Topcoat application will vary according to the nature of the topcoat. For best results, use Resene Room Velvet Primer as a primer.

**Application**

- Stir well with a wide flat stirrer.

**Cleaning**

- Clean up with warm soapy water when wet and with soap and water when dry. Use Resene Hot Weather Additive to slow drying.

**Use on interior surfaces where a hardwearing low sheen finish is required.**

**Standing**

- Apply two coats in the required colour allowing at least two hours between coats.
- Room Velvet is quite bland; with vapour, occasional skin contact at rest in a position comfortable for breathing.
- If medical advice is needed, have product container or label at hand.
- Room Velvet should not be poured into drains or waterways as it may be harmful if ingested. Never apply to floor surfaces that can be dampened or wetted.

**Technical Information**

- Uniform dull finish. To achieve this optimum results will require 2 coats. For further information contact your local Resene ColorShop or Reseller for advice.

**Compatibility**

- Old solventborne enamels require sanding to a uniform dull finish. For best results apply a full coat of Resene Sureseal (see Data Sheet D42) followed by lining paper is recommended in areas where high humidity. Do not apply under damp conditions.

**Eco-friendliness**

- Do not use with Resene Wintergrade Additive.

**Maintenance**

- Washability and final toughness will develop over several days as the curing period to ensure the paint is properly cured. This may require use of an extraction system when painting in marginal painting conditions. Do not use gas or diesel burners to heat coated area as these produce water that will inhibit curing.
- Maintenance is recommended after a minimum of four weeks' drying

**Notes**

- Spray application is not recommended on smooth surfaces.
- Room Velvet should not be poured into drains or waterways as it may be harmful if ingested. Never apply to floor surfaces that can be dampened or wetted.

**Use on Interior Surfaces**

- AUST: POISONS INFORMATION CENTRE 131 126 or call Resene 1800 738 383.
- See the Resene Caring for your paint finish brochure or the Resene website for more information.

**Before First Use**

- Stir well with a wide flat stirrer.

**Quick Check**

- Use on interior surfaces where a hardwearing low sheen finish is required. 
- Good Washability
- Low sheen
- Room Velvet
- low sheen hybrid waterborne-alkyd

**Resene Room Velvet Primer**

- Interior Surfaces where a hardwearing low sheen finish is required.

**Clean up**

- Clean up with warm soapy water when wet and with soap and water when dry. Use Resene Hot Weather Additive to slow drying.
