Resene Room Velvet is a beautiful, warm, velvety sheen finish. Designed for use on high traffic areas, it offers a luxurious, plush surface.

**Room Velvet**

**low sheen sheen finish**

**interior**

Preparation

- **Room Velvet** must be applied to an area conditioned, thoroughly sanded to a smooth finish, dry, free from dust, and smooth enough.
- It may be applied on an existing paint surface, provided the surface is dry, free from dust, and smooth enough.
- If the presence of residues or solvents is suspected, ensure they are removed with a suitable degreasing agent.
- Priming
  - Resene Broadwall Surface Prep & Seal (see Data Sheet D807), before coating. Undercured cementitious surfaces can significantly affect the performance and appearance of applied paint.
- **Topcoat**
  - A minimum of four weeks' drying is required before applying Resene Room Velvet or Resene Quick Dry over an appropriately sealed base. Refrigeration with a saturation coat of a fully penetrating primer may not be suitable basecoats for painting under stressed conditions. Reinforcement with a saturation coat of a fully penetrating primer based stoppings may not be suitable basecoats for painting under stressed conditions.
- **Thinner No.9** (spray).
- **Thinner No.2** (lower odour) or Mineral Turps.

**Application method**

- **Yes.**
- **Two. Bright colours may require three coats.**

**Usual number of coats**

- **Two.**

**Dry time (minimum)**

- **16 hours.**

**Coverage**

- **Similar as selected. When using multiple packs of this product on the same surface.**

**Topcoat**

- **Suitable for exterior use.**
- **Suitable for interio use.**
- **Suitable for ceiling use.**

**Quick check**

- **Use on interior surfaces where a hardwearing low sheen finish is required.**
- **Use on walls and ceilings.**
- **Coverage: 14 square metres per litre per coat.**
- **The spreading rate recommended for this product will work well on all surfaces, however, the spreading rates can vary depending on the type of surface.**
- **Use a Resene website for more information.**

**Drying**

- **TRAYING: If traying is being used, keep warm and dry.**
- **THINNING: If thinning is being used, keep warm and dry.**
- **CLEANING: If cleaning is being used, keep warm and dry.**
- **WEATHERING:**
  - **The product is suitable for outdoor use.**
  - **The product is not suitable for outdoor use.**

Resene Room Velvet dries to a luxurious finish. It is designed for use on high traffic areas, offering a luxurious, plush surface. The product should be applied to a conditioned area, thoroughly sanded to a smooth finish, dry, free from dust, and smooth enough. It can be applied on an existing paint surface, provided the surface is dry, free from dust, and smooth enough. Priming is necessary, and a minimum of four weeks' drying is required before applying Resene Room Velvet or Resene Quick Dry over an appropriately sealed base. Refrigeration with a saturation coat of a fully penetrating primer may not be suitable basecoats for painting under stressed conditions. Reinforcement with a saturation coat of a fully penetrating primer based stoppings may not be suitable basecoats for painting under stressed conditions. The spreading rate recommended for this product will work well on all surfaces, however, the spreading rates can vary depending on the type of surface. If traying is being used, keep warm and dry. If thinning is being used, keep warm and dry. If cleaning is being used, keep warm and dry. The product is suitable for outdoor use. The product is suitable for outdoor use.
