## Resene Sandtex Mediterranean Effect

**Exterior/Interior**

Resene Sandtex is a tough waterborne texture finish for beautifying and protecting your home. It provides a Mediterranean effect with the ability to increase the lifespan of exterior and interior surfaces. It is recommended for use on exterior cementitious surfaces, solid and semi-solid masonry, brick and stone, and interior surfaces such as walls, ceilings and tiles. It can be used in a well ventilated area indoors, away from foodstuffs, either between 15°C-20°C or at a cool, constant temperature. It is suitable for use on smooth and textured surfaces.

### Application

The new Resene Sandtex Mediterranean Effect provides a wide range of decorative and protective properties. It can be used to create a variety of effects, from subtle textures to bold patterns. Resene Sandtex is a versatile product that can be used on a wide range of surfaces, including walls, ceilings, and tiles. It can be applied using a variety of techniques, such as brush, roller, or spray. The surface is self-leveling and can be applied in one or two coats. The dried film is tough and durable, withstanding weather conditions and fading out of sunlight. Resene Sandtex is available in a range of colors, allowing for customization and personal expression.
