**WARNING**

Read label before use. Keep out of reach of children. This material contains a flammable liquid and vapour and may disperse fumes or mist that are harmful if inhaled. The liquid forms a strong film that is harmful if swallowed. If inhaled or ingested, seek expert medical advice immediately; do not induce vomiting.

**PRECAUTIONS**

- Avoid breathing fumes, vapours, mists or spray. Use with adequate ventilation.
- Use explosion proof electrical/ventilating/lighting equipment. Use only non-sparking tools.
- Operate within 15°C-20°C or at a cool, constant temperature. Do not get in eyes, on skin or on clothing. Ground/bond container and receiving equipment. Take precautions against static discharge. Use explosion proof electrical/ventilating/lighting equipment. Use only non-sparking tools.
- Handle with care; do not overfill container. Do not allow to enter drains or sewers, stormwater or surface water systems. Do not allow to enter drains or sewers, stormwater or surface water systems.
- Store locked up. Wear protective gloves and eye/face protection. Wash hands thoroughly after handling. In case of contact with eyes, flush with water for at least 15 minutes. In case of contact with skin, wash at least 15 minutes with soap and water. In case of ingestion, do not induce vomiting. Call a Poison Centre immediately.

**APPLICATION**

Resene Solventborne Aquapel is a clear silicone water repellent for application on most porous building materials to impart water shedding properties. It can be used over a porous surface that will allow the treatment to penetrate. It cannot be applied over a fully sealed surface that has already weathered.

**Preparation**

- Ensure all surfaces to be treated are dry, free of dust, dirt and loose materials, oil and grease.
- If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80). Flush with clean water before re-use.
- Remove oil and grease from surface using Resene Paint Prep and Housewash (see Data Sheet D812).
- All sanding dusts may be harmful and appropriate protection must be worn. In particular dusts from old lead or chromate based paints or old building materials containing asbestos may be injurious to health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.
- This product may be used to treat a wide variety of surfaces. If the surface you propose to treat is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or Reseller.

**Application**

- Resene Solventborne Aquapel can only be used over a porous surface that will allow the treatment to penetrate. It cannot be applied over a fully sealed surface that has already weathered.
- Store thoroughly before use. Apply by brush, roll or spray. Saturate the surface with Resene Solventborne Aquapel.
- Remove any Resene Solventborne Aquapel that gets onto glass to avoid the risk of staining.
- Fit starts to run, immediately cease application and cover all treated areas that have yet to dry out.
- Maintain good ventilation throughout the drying and curing period to ensure the treatment is properly cured. Poor ventilation may inhibit curing and performance.
- Maximum hydrophobicity (or water repellency) develops after a few days weathering.
- Recast after 6 hours under normal conditions. Be PaintWise.

For tips on minimising the impact of your decorating on the environment see the Resene website.

**First Aid**

- IF SWALLOWED: Immediately call a POISON CENTRE or doctor/physician. Take off contaminated clothing and wash skin with soap and water. Do NOT induce vomiting.
- IF INHALED: Remove to fresh air. If not improved, seek medical advice. Do NOT induce vomiting.
- IF IN EYES: Rinse with plenty of water for at least 15 minutes. If irritation persists, seek medical advice.
- IF ON SKIN (or hair): Wash with plenty of soap and water; If skin irritation occurs: get medical advice. Take off contaminated clothing and wash affected area with soap and water.
- IF ON CLOTHING: Wash before re-use.

**Environment**

- Contain spillage. Collect and seal in properly labelled drums. Do not allow to enter drains or sewers, stormwater or surface water systems. Refer to local waste management authority.
- Clean up spillage.
- Do NOT discharge into drains or sewers. Do not allow to run off into waterways. Refer to local waste management authority.
- Dispose of containers as hazardous waste.
- Clean equipment and disposing of unwanted paint. Avoid release into the environment. Obtain special instructions before use. Clean up spillage.

**Storage**

- Store in original or correctly labelled container, tightly closed, in a cool, well ventilated area indoors, away from foodstuffs, either between 15°C-20°C or at a cool, constant temperature. Do not get in eyes, on skin or on clothing. Ground/bond container and receiving equipment. Take precautions against static discharge. Use explosion proof electrical/ventilating/lighting equipment. Use only non-sparking tools.
- Store locked up. Wear protective gloves and eye/face protection. Wash hands thoroughly after handling. In case of contact with eyes, flush with water for at least 15 minutes. In case of contact with skin, wash at least 15 minutes with soap and water. In case of ingestion, do not induce vomiting. Call a Poison Centre immediately.

**Use on:** Most porous building materials. Glass level: None – fully penetrating. Typical coverage: Depending on surface porosity, typically 2.5 square metres per litre for concrete block, 0.10 square metres per litre for concrete (SD, plaster, plaster).

**Dry time:** (minimum): Penetrates – up to 48 hours for solventborne; up to 14 days for water repellent.

**Prime required:** No.

**Usual number of coats:** 1-2 to achieve satisfactory results.

**Application method:** Low pressure spray is best, brushes or rollers. Thinning and cleaning up: Minimal tares. Colour range: Clear.
