**Sidewalk paving paint**

**Resene Sidewalk** is based on tough, flexible polyurethane resins to give maximum abrasion resistance in a non-slip finish. The surface finish of Resene Sidewalk is designed to reduce the hoarding of dirt.

**Add Resene SRG Grit for extra slip resistance.**

**Preparation**

- Thin surfaces to be painted are sound, dry, free from dirt, dust and loose material.
- New concrete must be allowed to cure for a minimum of 28 days.
- Concrete or stone should be acid washed to remove laitance or grease and laitance. If acid washing is impractical, prime the surface with Resene Quick Dry (see Data Sheet D45) and allow 8.5 hours dry time before applying Resene Sidewalk.
- Application: Thoroughly sand and scrape to remove any weakly adhering or flaking material before priming.  Removal of efflorescence is recommended (see Data Sheet D80).
- In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application. In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application. In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.

**Application method**

- Resene Sidewalk is recommended on exterior timber and for restoration of badly weathered timber surfaces.
- Primary exterior timber with Resene Wood Primer (see Data Sheet D40).
- Resene Sidewalk (see Data Sheet D50) is recommended for industrial surface areas. Will chalk in exposed exterior conditions.

**Usual number of coats**

- Primer required
- Usual number of coats: 2 coats
- For extra slip resistance add one pack (500g) of Resene SRG Grit per litre of Resene Sidewalk
- Topcoat: Apply coat and allow at least 18 hours dry time.
- For extra slip resistance add one pack (500g) of Resene SRG Grit per litre of Resene Sidewalk in the first coat.
- Apply second coat and allow at least 24 hours dry time before subjecting painted area to light foot traffic.
- If waterblasting over five days prior to application of Resene Sidewalk is required, re-prime with Resene Quick Dry (see Data Sheet D45) and allow 8.5 hours dry time.

**Quick check**

Use as: interior and exterior domestic surfaces and light industrial surface areas. Will chalk in exposed exterior conditions.

**Printing**

- Resene Sidewalk is recommended on exterior timber and for restoration of badly weathered timber surfaces.
- Thoroughly sand and scrape to remove any weakly adhering or flaking material before priming.
- If waterblasting over five days prior to application of Resene Sidewalk is required, re-prime with Resene Quick Dry (see Data Sheet D45) and allow 8.5 hours dry time.
- Test small area first or contact your local Resene ColorShop or Reseller for advice.
- Ensure that use of this product is compatible with the substrate and conditions under which it will be used. It is recommended that a small test panel be prepared and tested in situ for correct consistency of product, application method and colour selection. Resene does not accept any responsibility for the application of incorrect product to substrate or the application of incorrect colours. For further printing advice and information, call 1800 738 383 (AUST), 0800 0800 737 363 (NZ).

**FLAMMABLE LIQUID AND VAPOUR**

Keep away from ignition sources such as heaters/oven/filament household lights. Not suitable for use in confined spaces or surroundings, or for use near live electrical equipment. In case of fire:

- Use water/glass/wet earth/foam/CO2 fire extinguishers.
- Do not use CO2, O2 or CO fire extinguishers.
- Do not use water with added Resene SRG Grit.

**Cleansing Paint Equipment**

For full technical instructions see Data Sheet D200.

**Do Not Breathe Fumes/Mists/Sprays/Vapours. Do Not Eat, Drink Or Smoke.**

**Selling Agent**

- Liquid Hydrocarbons 500-550 gms/L.
- Used paper and cardboard
- Clean metal containers
- Glass or ceramic containers
- Compostable organic material
- Unbleached wood
- Regenerate
- Compostable organic material
- Unbleached wood
- Regenerate

**Disposal**

- If the presence of these materials is suspected.
- Based paints or old building materials containing asbestos may release to the environment. Clean up spillage. Dispose of empty container safely. Consult management authority.

**Further information**

- NZ: NATIONAL POISONS CENTRE 0800 POISON
- For medical advice/attention. If medical advice is needed, have product container or label at hand. If exposed or concerned:
  - IF ON SKIN (or hair): Remove/take off all contaminated clothing and wash before re-use.
  - IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position away from foodstuffs, either between 15˚C-20˚C or at a cool, constant temperature.
  - IF SWALLOWED: Call Resene on 0800 737 363 or call Resene 0800 737 363.
  - Call NZ: NATIONAL POISONS CENTRE 0800 POISON.
  - Call 111 in an emergency.

**Read all safety precautions before use.**

**Additional information**

- For tips on minimising the impact of your decorating on the environment see the Resene website.
- Compostable organic material
- Unbleached wood
- Regenerate
- For maximum coverage, allow 24 hours dry time before applying finish coats.
- Do not handle until all safety precautions have been read and understood. Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from the reach of children. Do not take internally. Use only as directed. For extra slip resistance add one pack (500g) of Resene SRG Grit per litre of Resene Sidewalk.
- Maintain good ventilation throughout the drying and curing period to ensure the paint is properly cured. For further technical information, call Resene on 0800 737 363 or call Resene 0800 737 363.
- In case of fire:
  - Use water/glass/wet earth/foam/CO2 fire extinguishers.
  - Do not use CO2, O2 or CO fire extinguishers.
  - Do not use water with added Resene SRG Grit.
