Sonyx 101 is a waterborne semi-gloss finish optimised for superior performance, durability and adhesion, combined with superb flow and good looks.

**Application**

- **For best results** apply with Sonyx 101 Resin to ensure a high build and the best finish. Sonyx 101 is also available as Resene Sonyx 101 CoolColour to help reduce the visual impact of exterior temperatures and to help reduce the building heat load especially in summer.

**Primer**

- **For bare or treated wood surfaces** apply Resene TimberLock as a primer. Resene Timlock may also be used on exterior timbers and metal or concrete before applying Sonyx 101.

**Maintenance**

- **Shallower recoats** may be required at the end of their useful life. Sonyx 101 has a long life expectancy but will eventually be needed to be retouched.

**Preparation**

- **Leftover water-based finishes** may be thinned with up to 5% water. Thinning beyond 5% will reduce performance.

**Cleaning Paint Equipment**

- **Brushes and rollers** should be cleaned immediately after use and before the paint begins to dry. Remove excess paint from the brush or roller using the appropriate cleaning fluid. Clean the brush or roller in a bucket of warm soapy water. Wash thoroughly and rinse in clean water. Paint are best stored in the upright position.

**Storage**

- For full technical instructions see Data Sheet D30.

**Use and Disposal**

- **For use as a decorative/protective coating.**

- **Efflorescence on masonry, galvanised steel and Zincalume.**

- **Substitution may cause substandard results or system failure. For products are designed to be used as a system for optimal results.**

**For tips on responsible disposal of paint, cleaning equipment and minimising the effects on the environment.**

**For full cleaning instructions.**

**For use on:***

- Timbers:
- Hardwoods
- Softwoods
- Damp, old cementitious roof tiles, weathered galvanised steel or Zincalume.

- Houses & houses:
- In good condition
- Damp
- Efflorescence
- Masonry

- Other:
- Strip off any old coatings before applying.
- Old building materials containing asbestos must not be mixed or painted.
- Do not allow to enter drains or to run off into waterways. Refer to local waste management authority.

**For full technical instructions see Data Sheet D30.**

**Data Sheet D83.**

- For incorrect
- of incorrect colours. Resene
- stormwater drain where it may harm fish in local waterways.

- Not recommend for use with
- where it may harm fish in local waterways.

- Do not allow to enter drains or to run off into waterways. Refer to local waste management authority.

- Collect and seal in properly labelled drums. Do not allow to enter drains or to run off into waterways. Refer to local waste management authority.
