**SpaceCote Flat Kitchen & Bathroom**

**interior waterborne enamel**

Fluoro SpaceCote Flat Kitchen & Bathroom combines the popular features of Resene SpaceCote Flat with additional characteristics to resist washdown, and the anti-bacterial protection of algae to drive bacteria, providing a safer environment for those who live and work in the area. Also assists with absorbing formaldehyde.

**Preparation:**
- Ensure surfaces to be painted are in sound condition, thoroughly sanded to a manner comfortable for breathing.
- All surfaces to be painted must be primed with Resene Concrete Primer (see Data Sheet D318) before application of topcoats. This product is used to prime concrete and masonry surfaces. It provides a firm base for Resene topcoat paints and hardens.
- Neutralise all alkaline components from the surface. If any marks appear use Resene Interior Paintwork Cleaner, following the full cleaning instructions.

**Packaging:**
- The spreading rate recommended for this product will vary depending on the condition of the surface to be covered. The spreading rate is 8 square metres per litre. The usual number of coats is specified under the table heading Usual number of coats.

**Application:**
- For use as a decorative/protective coating. Resene products are designed to be used as a system for paint application. In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.
- While the coating is serviceable after 48 hours, depending on film thickness, tinter level and subsequent firing, it is recommended that it be fired up to 5°C above room temperature, to reduce the risk of cracking and system failure. For further painting advice and information, call 1800 738 383 (AUST), 0800 737 363 (NZ) or visit the Resene website. Do not wash the surface with a cloth and check surface for surface tack.

**Time taken:**
- Dry time (minimum): 48 hours depending on film thickness, tinter level and subsequent firing, to reduce the risk of cracking and system failure. For further painting advice and information, call 1800 738 383 (AUST), 0800 737 363 (NZ) or visit the Resene website. Do not wash the surface with a cloth and check surface for surface tack.

**Usual number of coats:**
- 1 coat

**Coverage:**
- 8 square metres per litre

**Primer required:**
- Yes, dependent on surface.

**Dry time (minimum):**
- 48 hours depending on film thickness, tinter level and subsequent firing, to reduce the risk of cracking and system failure. For further painting advice and information, call 1800 738 383 (AUST), 0800 737 363 (NZ) or visit the Resene website. Do not wash the surface with a cloth and check surface for surface tack.
