Resene Squash Court Coating is a two pack waterborne epoxy especially developed for coating squash court walls.

**Generic**
- **Resene Data Sheet**: Available and must be consulted before use.
- This product must be thoroughly mixed before use. Efficient mixing at all stages requires power mixing with an air or an explosion proof mixer until uniformly blended.
- Thinning requirements may vary according to application method, equipment and environmental conditions.
- If thinning is required thoroughly re-mix using the power mixer.
- Ensure correct wet film thickness is achieved to achieve desired dry film thickness. Allowance must be made for any thinner required.
- Use of incorrect thinner may have an adverse effect on application and performance.
- Drying is affected by low temperatures and high humidity.
- The temperature of the substrate should be 5°C above the “Dew Point”.
- The “Dew Point” requirement can be presumed to be satisfied if a thin clearly defined film of water applied to the cleaned surface with a damp cloth evaporates within 15 minutes.
- Following appropriate preparation, all surfaces must be sound, dry and clean prior to painting.

**This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, contact your local Resene retailer/Reseller for your nearest technical representative.**
