StainLock waterborne stain sealer

**Preparation**
- Resene stain sealers are to be used in sound condition. Free from dirt, dust, loose material, oil (including mineral oil-based sealers or similar) and silt.
- Fill cracks and holes with an appropriate filler prior to painting.
- If mould is present, treat with Resene Mould & Mildew Killer (see Data Sheet D236).
- Wherever present, the surface is thoroughly brushed using Resene Paint Prep & Handscour (see Data Sheet D433), Flash clean with water.
- Not recommended for use as a first coat on metal surfaces.
- Ensure the source of water has been resolved before coating water-stained areas.
- Where there is a risk of time staining, a coat of Resene Limelock (see Data Sheet D809) is recommended.
- Palisade board must be prepared to an appropriate level of finish. Either Resene Broadbase Surf Prep or a further application of Resene Broadbase (see Data Sheet D825) is recommended for the first coat, followed by brushing paper to ensure a fine finish. It may be necessary to use additional coats of Resene Broadbase (see Data Sheet D825) to achieve a good finish in critical lighting areas.
- All handling may be harmful and appropriate protection must be worn. In particular dust from old lead or chromate based paints or old building materials containing asbestos may be hazardous to health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.
- This product may be used to coat a wide variety of surfaces. If the surface you propose to coat is unsuitable or not referred to, try a small test area before your contact your local Resene Stainlock or Resene for advice.

**Application**
- Apply to one or two coats.
- In typical drying conditions Resene Stainlock may be overcoated after two hours. In cooler weather Resene Stainlock is best overcoated after eight hours with water-based paints.
- Stains may bleed into Resene Stainlock but should remain in place and not bleed through into subsequent coats.
- When spraying Resene Stainlock it is essential to ensure that the spray gun, spray nozzle assemblies and air cleaner are thoroughly cleaned to remove all paint residues that may be present in the spray equipment. Resene Stainlock will not bond to backed-up paint film within the spray unit and will not block in nozzles, fog or nozzles.

**Spills**
- Use with adequate ventilation. Do not eat, drink or smoke when using.
- Spills of Resene Stainlock should be covered with sand or earth. Collect and seal in properly labelled drums. Do not allow spills to enter drains or to run off into waterways. Refer to local waste disposal regulations. Further information can be obtained from NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766) or call Resene 1800 738 383.

**FIRST AID**
- **IF IN EYES:** Rinse cautiously with water for several minutes. Remove any contact lenses if present and after rinsing continue to flush eyes. Call a Poison Centre, doctor or chemical supplier/agent, as appropriate.
- **IF SWALLOWED:** Rinse mouth. Call a Poison Centre or doctor and refer to local regulations. Further information can be obtained from NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766) or call Resene 1800 738 383.
- **IF INHALED:** Remove to fresh air. If feeling unwell, get medical attention/advice.
- **IF SKIN CONTACT:** Wash thoroughly and with soap and water. Remove any contaminated clothing and shoes, then wash clothing and shoes separately from other laundry.

**Precautions**
- Keep out of reach of children. This material is quite bland; with occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact may cause irritation.
- Non-sensitive individuals will, cause irritation.
- When seeking medical advice take this container with you.
- There is no specific antidote. Treatment is symptomatic.
- To enter drains or to run off into waterways. Refer to local waste disposal regulations. Further information can be obtained from NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766) or call Resene 1800 738 383.
