SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. Causes mild skin and eye irritation. Do not allow to enter drains.集和 seal in properly labelled drums. Do not allow SPILLS:

Sheet D315SC. For full technical instructions see Data Sheet D315S. For use as a decorative/protective coating.

NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766)

irritation persists get medical attention or advice.

contact lenses if present and easy to do so. Continue rinsing. If eye irritation persists get medical attention or advice.

IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation persists get medical attention or advice.

IF IN EYES: Rinse cautiously with water for several minutes. If irritation continues get medical attention or advice.

IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell.

FIRST AID

• Remove clothing and footwear. Get medical attention immediately. Peel clothing away from body with care. Do not rub or scrub skin.

• Skin irritation causes redness and itching. Causes eye irritation.

• If symptoms or irritation occur: get medical attention or advice.

PRECAUTIONS

• Always wear a mask and ensure the area is well ventilated. Do not spray in the presence of open flames or naked or electrically heated surfaces. Allow to dry in a well ventilated area away from heat. Do not apply at ambient temperatures below 10°C or when temperatures are liable to fluctuate while spraying. Do not apply to leather, rubber or metal surfaces as these will be discoloured. Do not apply when winds are above 20km/h. Apply to a smooth, firm and level surface at a temperature above 10°C. Do not apply when more than 1°C temperature drop is expected within 1 hour. Do not apply when the substrate is hot to the touch (above 50°C) or too hot to maintain hand contact on. When spraying under cool or wet conditions (e.g. fog, drizzle, light rain) apply a single coat at a rate of 8-12 litres/100m² to ensure penetration of the surface. Do not apply if rain is expected within 4 hours. When spraying in low temperatures and high humidity. Do not apply under conditions which may cause rapid evaporation and, depending on the substrate, may reduce the recommended addition rate of 0.5% to 1.0% (by volume).
