Resene Summit Roof Metallic

Resene Summit Roof is a unique waterborne metallic roof paint designed for ease of application and maximum life over properly prepared metal surfaces. Well suited to COLORTUBE® and COLORSTEEL® and gives a new dimension to roof designs.

**Preparation**
- Any loose, flaky, rust, black or white rust and moss, or contamination caused by airborne material must be removed. Wherever oil and grease are present and when painting asphalt or bitumen, remove with a degreaser. See Data Sheet D402 as soon as possible. If the galvanised steel surface has been painted before, consult your Resene ColorShop or reseller for advice.
- When repainting spot prime all bare areas with Resene Galvo One. Resene Galvo One is best applied by brush to ensure full surface wetting of the substrate is achieved.
- Body painting advice and information, call 1800 738 383 (AUST), 0800 737 363 (NZ)
- Resene products are designed to be used as a system for optimal results. If due to climatic conditions foam persists after rolling, use a wider brush. See Data Sheet D402 as soon as possible (if the galvanised steel surface has been painted before, consult your Resene ColorShop or reseller for advice). If the surface you propose to paint is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or reseller for advice.

**Application**
- To apply paint, stir well with a wide flat stirrer. For tips on responsible disposal of paint, cleaning and performing advice on painting of old cementitious roof tiles or if you have not applied this product previously, consult your Resene ColorShop or the Resene website for a copy.
- See the Resene Caring for your paint finish brochure or the Resene website for more information.

**Thinning:**
- If using this product tinted to a Resene CoolColour™, see Data Sheet D80.
- Resene Summit Roof is a unique waterborne metallic roof paint designed for ease of application and maximum life over properly prepared metal surfaces. Well suited to COLORTUBE® and COLORSTEEL® and gives a new dimension to roof designs.

**Dry time:**
- Stir well with a wide flat stirrer.
- Before consulting your local Resene ColorShop or reseller for advice.
- Resene Summit Roof Metallic is not needed to new roof prior to painting. Apply new roof paint designed for ease of application and maximum life over properly prepared metal surfaces.

**Recoat time:**
- Stir well with a wide flat stirrer.
- Before leaving the house or painting your roof, check with the local environmental management authority.

**Maintenance:**
- Resene Summit Roof Metallic is not needed to new roof prior to painting. Apply new roof paint designed for ease of application and maximum life over properly prepared metal surfaces.
