Tennis Court Coating

waterborne exterior/interior

KEEP OUT OF REACH OF CHILDREN
SAFETY PRECAUTIONS

Read label before use. Keep out of reach of children. This material is quite bland; with vapour, occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact may, and any eye contact will, cause irritation. Harmful to aquatic life with long lasting effects.

PRECAUTIONS

USE WITH ADEQUATE VENTILATION. DO NOT EAT, DRINK OR SMOKE WHILE USING. Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from foodstuffs, either between 15°C-20°C or at a cool, constant temperature. Dispose of empty container safely. Consult Resene checklist on environmentally acceptable methods of cleaning equipment and disposing of unwanted paint. Do not contaminate any water supply. Avoid release to the environment.

FIRST AID

IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or pharmacist if you feel unwell.

IF ON SKIN (or hair): Rinse skin with plenty of soap and water. If skin irritation or rash occurs, get medical attention or advice.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists, get medical attention or advice.

IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. When seeking medical advice take this container with you.

Further information can be obtained from:

AUST: POISONS INFORMATION CENTRE 131 126 or call Resene 1800 738 383.
NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766) or call Resene 0800 737 363.
For use as a decorative/protective coating. For full technical instructions see Data Sheet D303.

SPILLS: Wear appropriate protective clothing. Absorb with sand or earth. Collect and seal in properly labelled drums. Do not allow to enter drains or to run off into waterways. Refer to local waste management authority.

CLEANING PAINT EQUIPMENT: Brush/roll out as much paint as possible onto newspaper before washing brushes and rollers. Dispose of wash-up water onto grassy/unsealed area or into inside sink/basin, NOT into outside stormwater drain where it may harm fish in local waterways.

Resene Tennis Court Coating is a waterborne coating filled with graded silicas. Designed for use on both concrete and composite courts to give a durable, tough topping with excellent traction and even bounce properties.

Resene Tennis Court Coating conforms to the technical criteria required of tennis court surfaces to appear in the International Tennis Federation’s Court Surface Classification Scheme (2001). Court surfaces that have a surface pace rating of between 0-35 are classified as slow pace. With a pace rating of 25.6, Resene Tennis Court Coating is classified as a slow pace court finish and is generally recommended for use with a low bouncing, faster ball. Examples of court surface types that conform to this classification include most clay courts and other types of unbound mineral surface courts. If used with a standard tennis ball, a slow pace court will play slower, and is therefore ideal for general use on courts at locations such as tennis clubs, schools and holiday resorts.

Preparation

• Ensure substrates to be coated are in sound condition, dry, free from dirt, dust, loose material, oil (including mineral oil based wood finishes or similar) and salt.
• Remove accumulated windblown salt by washing with Resene Paint Prep and Housewash (see Data Sheet DB12).
• New concrete must be allowed to cure for a minimum of 28 days. Concrete courts must be acid etched (see Data Sheet D83).
• Oil and grease must be removed using Resene Paint Prep and Housewash.
• Efflorescence on concrete must be treated (see Data Sheet D83).
• When recoating a surface previously coated with other than Resene Tennis Court Coating, all old coatings must be removed using an abrasive blasting or diamond grinding. Coating removal must leave a clean surface ready to be coated with a surface profile resembling 180 grit sandpaper. CARE IS REQUIRED TO AVOID LEAVING A SURFACE RICH IN AGGREGATE.
• When recoating a surface previously successfully coated with Resene Tennis Court Coating, first sand etch any exposed bare concrete, then prime with Resene Tennis Court Coating before recoating the cleaned surface or spot prime any exposed bitumen with Resene Membrane Roofing Primer (see Data Sheet D49) or exposed bare concrete with Resene Sureseil (see Data Sheet D42) before recoating.

All sanding dusts may be harmful and appropriate protection must be worn. In particular dusts from old lead or chromate based paints or old asbestos containing building materials may be injurious to health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.

This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or Reseller for advice.

Application

• Spray using a Graco GMAX 7900 HD unit with a flow rate of no less than 8.3 litres per minute, fitted with a ½ inch hose and in line gun fitted with a 49 thou tip.
• For roller application use a Resene No.15 High Solids sleeve.

Be PaintWise

For tips on minimising the impact of your decorating on the environment see the Resene website.

Colour range:

- Terracotta 10TC20
- Dark Green 10TC30
- Green 10TC10
- Dark Blue 10TC40
- Blue 10TC50

Use on: Concrete and bitumen surfaces.

Gloss level: Rough texture.

Coverage: Spray 2 square metres per litre. Rolling first coat 2-6 square metres per litre, second coat 4-6 square metres per litre.

Dry time (minimum): 1 hour at 17°C. Allow at least 24 hours before using courts.

Do not apply at temperatures below 10°C or when temperatures are liable to drop below this during the drying period. Drying is slowed by low temperatures and high humidity.

Recycle time (minimum): 3 hours. Primer required: Dependent upon surface.

Application method: Spray. For roller application use a Resene No.15 High Solids sleeve.
