SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. This material is quite bland; with vapour, occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact may, and any eye contact will, cause irritation. Harmful to aquatic life with long lasting effects.

PRECAUTIONS
USE WITH ADEQUATE VENTILATION. DO NOT EAT, DRINK OR SMOKE WHILE USING. Store in original or correctly labelled container, tightly closed, in a well ventilated area indoors, away from foodstuffs, at an ambient temperature and avoid freezing conditions. Avoid releasing to the environment.

FIRST AID
IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell. IF ON SKIN (or hair): Rinse with plenty of soap and water. If skin irritation or rash occurs get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irritation persists get medical advice or attention. IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. When seeking medical advice take this container with you. Further information can be obtained from NZ: NATIONAL POISONS CENTRE 0800 737 363 or call Resene 0800 738 383.

Preparation
Ensure substrates to be coated are in sound condition, dry free from dirt, dust, loose material, oil (including mineral oil based wood finishes or similar) and salt.
- Remove accumulated windblown salt by washing with Resene Paint Prep and Housewash (see Data Sheet D812).
- New concrete must be allowed to cure for a minimum of 28 days. Concrete courts must be acid etched (see Data Sheet D83).
- Oil and grease must be removed using Resene Paint Prep and Housewash.
- Efflorescence on concrete must be treated (see Data Sheet D83).
- When recoating a surface previously coated with other than Resene Tennis Court Coating, all old coatings must be removed by captive abrasive blasting or diamond grinding. Coating removal must leave a clean surface ready to be coated with a surface profile resembling 180 grit sandpaper. CARE IS REQUIRED TO AVOID LEAVING A SURFACE RICH IN AGGREGATE.
- When recoating a surface previously successfully coated with Resene Tennis Court Coating, first acid etch any exposed bare concrete, then prime with Resene Tennis Court Coating before recoating the cleaned surface or spot prime any exposed bitumen with Resene Membrane Primer (see Data Sheet D49) or exposed bare concrete with Resene Suresale (see Data Sheet D42) before recoating.
- All sanding dusts may be harmful and appropriate protection must be worn. In particular dusts from old lead or chromate based paints or old asbestos containing building materials may be injurious to health if inhaled. Ingested, expert advice if the presence of these materials is suspected.
- This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or Reseller for advice.

Application
- Spray using a Graco MAXIM 7900 HD unit with a flow rate of no less than 8.3 litres per minute, fitted with a ½ inch hose and in line gun fitted with a 45 thou tip.
- For roller application use a Resene No.15 High Solids sleeve.

Be PaintWise
For tips on responsible disposal of paint, cleaning equipment and minimising the impact of your decorating on the environment see the Resene website. Do not discharge any paint into the environment. Resene PaintWise (NZ) or paintback.com.au (Australia) accepts residual unwanted paint and packaging. Or contact your Local Authority for disposal information.

Quick check
Use on: Concrete and bitumen surfaces. Gloss level: Rough texture.
Coverage: Spray 2 square metres per litre. Rolling - first coat 2-6 square metres per litre, second coat 4-6 square metres per litre.
Dry time (minimum): 1 hour at 17°C. Allow at least 24 hours before using courts.

Assorted colours are available. Resene Paints Limited accepts no responsibility for the application of incorrect product to substrate or the application of incorrect colours. Resene products are designed to be used as a system for optimal results. Substitution may cause unsatisfactory results or system failure. For further painting advice and information, call 1800 738 383 (AUS), 0800 737 363 (NZ) or visit the Resene website.

Dispose of unwanted paint and packaging properly. Visit www.resene.com.au or contact your local Resene Paints Limited staff to find out more. To discuss your project, request a Resene Colour Chart, or to download helpful tips and other Resene resources, visit www.resene.com.au
