Resene Uracryl 403 is a unique high performance two component finish coat with excellent resistance to abrasion, mastication, potassium sulfates and moisture and vegetable oils, alcohols and acids. The most unusual feature of Resene Uracryl 403 is that, unlike most other coating systems, it can be applied cold, even in adverse weather conditions. It is unsurpassed for gloss and colour retention. Resene Uracryl 403 is a unique high performance two component system.
