Resene

Walk-on Concrete Clear

exterior protection for concrete and pavers
waterborne

KEEP OUT OF REACH OF CHILDREN
SAFETY PRECAUTIONS
Read label before use. Keep out of reach of children. This material is quite bland; with vapour, occasional skin contact and even minor ingestion having negligible hazard. Repeated skin contact may, and any eye contact will cause irritation. Harmful to aquatic life. Harmful to the soil environment.

PRECAUTIONS
USE WITH ADEQUATE VENTILATION. DO NOT EAT, DRINK OR SMOKE WHILE USING.

FIRST AID
IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor or physician if you feel unwell.
IF ON SKIN (or hair): Rinse skin with plenty of soap and water, if skin irritation or rash occurs, get medical advice or attention.
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing. If eye irritation persists, get medical advice or attention.
IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. When seeking medical advice take this container with you.

PREPARATION
Ensure substrates to be coated are in sound condition, dry, free from dirt, dust, loose material, oil (including minimal oil based wood finishes or similar) and salt.
New concrete must be allowed to cure for a minimum of 28 days before coating. Efflorescence on concrete must be treated, if the cause of efflorescence cannot be identified and corrected DO NOT apply Resene Walk-on Concrete Clear.
Splash water onto the surface, if the concrete does not immediately absorb the water and darken then grinding is the only surface preparation option.
Waterblasting is the best surface preparation for weathered concrete.
If oil and grease are present ensure the surface is thoroughly cleaned using Resene Heavy Duty Paint Prep and Oil Remover (see Data Sheet D816). If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D880). Efflorescence on masonry must be treated (see Data Sheet D83).

APPLICATION
Do not shake contents, rather stir well with a wide flat stirrer.
Apply one coat and allow at least two hours to dry. On old or weathered cementitious substrates seal with one coat of Resene Walk-on Concrete Clear thinned 10% with water and allow 24 hours before applying finish coats.
Apply an additional two unthinned coats and allow at least 12 hours dry time before subjecting painted areas to light foot traffic. Allow 48 hours for full cure.
Maintain good ventilation throughout the drying and curing period to ensure the paint is properly cured. Poor ventilation may inhibit curing and performance.
Trafficable areas coated with this unmodified product will not comply with the Building Act Clause D1.3.3d. Surfaces Coated with RESENE WALK-ON CONCRETE CLEAR MAY BE SLIPPERY WHEN WET.

MAINTENANCE
If cleaning is required, use Resene Paint Prep and Housewash correctly diluted with water and a soft broom to clean down the surface.
Apply Resene Deep Clean (see Data Sheet D815) at the start of spring and autumn for control of algal growth.

IF INHALED: if breathing is difficult, remove to fresh air

and water, if skin irritation or rash occurs, get medical

IF IN EYES: Rinse cautiously with water for several

Resene Walk-on Concrete Clear is based on tough waterborne resins to give maximum abrasion resistance in a single pack satin finish on concrete surfaces subject to foot traffic.

- Ensure substrates to be coated are in sound condition, dry, free from dirt, dust, loose material, oil (including minimal oil based wood finishes or similar) and salt.
- New concrete must be allowed to cure for a minimum of 28 days before coating. Efflorescence on concrete must be treated, if the cause of efflorescence cannot be identified and corrected DO NOT apply Resene Walk-on Concrete Clear.
- Splash water onto the surface, if the concrete does not immediately absorb the water and darken then grinding is the only surface preparation option.
- Waterblasting is the best surface preparation for weathered concrete.
- If oil and grease are present ensure the surface is thoroughly cleaned using Resene Heavy Duty Paint Prep and Oil Remover (see Data Sheet D816). If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D880). Efflorescence on masonry must be treated (see Data Sheet D83).
- All sanding dusts may be harmful and appropriate protection must be worn. In particular, dusts from old lead or chrome based paints or old building materials containing asbestos may be injurious to health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.
- Test for moisture by taping a 30cm square of clear plastic to concrete surface. If moisture appears under plastic after 48 hours leave and repeat test until plastic is clear.
- This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or Reseller for advice.

Application

- Do not shake contents, rather stir well with a wide flat stirrer.
- Apply one coat and allow at least two hours to dry. On old or weathered cementitious substrates seal with one coat of Resene Walk-on Concrete Clear thinned 10% with water and allow 24 hours before applying finish coats.
- Apply an additional two unthinned coats and allow at least 12 hours dry time before subjecting painted areas to light foot traffic. Allow 48 hours for full cure.
- Maintain good ventilation throughout the drying and curing period to ensure the paint is properly cured. Poor ventilation may inhibit curing and performance.
- Trafficable areas coated with this unmodified product will not comply with the Building Act Clause D1.3.3d. Surfaces coated with Resene Walk-on Concrete Clear may be slippery when wet.

Maintenance

- If cleaning is required, use Resene Paint Prep and Housewash correctly diluted with water and a soft broom to clean down the surface.
- Apply Resene Deep Clean (see Data Sheet D815) at the start of spring and autumn for control of algal growth.
