Water Lockout
watertight membrane for exterior use only

Resene Water Lockout is a versatile high build liquid waterproofing membrane based on a urethane modified bitumen emulsion. Comes to a seams a highly elastic and durable film that adheres well to most substrates to block water ingress.

**Preparation**
- Ensure all surfaces to be treated are dry, free from dust, dirt and loose materials, oil and grease.
- Remove oil and grease from surface using Resene Paint Prep and Prepwash (see Data Sheet D102).
- Prior to use, dry, hot or very absorbent surfaces, such as concrete, should prior to applying Resene Water Lockout.
- This product may be used to seal a wide variety of surfaces. If the surface you propose to treat is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or Reseller.

**Application**
- Apply each coat at right angles to the dry preceding coat.
- For flat surfaces, a pour and spread application technique a squeegee may be used to achieve a uniform wet film thickness and to fill voids on horizontal surfaces.
- Do not use as a curing membrane on surfaces to be painted.
- If on skin (or hair): Wash with plenty of soap and water. If skin irritation occurs get medical advice.
- If swallowed: Rinse mouth. Call a POISON CENTRE, doctor or first aider if you feel unwell.
- If in eyes: Remove contact lenses if present and easy to do so. Continue irrigation with water unless medical assistance is required.
- If on clothing: Remove clothing and wash immediately with plenty of soap and water.

**Gloss level:** Satin.

**Dry time (minimum):** 1-3 hours. Full dry 3-4 days.

**Application method:** Brush, roller (high solids sleeve) or squeegee (flat surfaces only). Typically not required.

**Primer required:** Typically not required.

**Resene products are not referred to, try a small test area first or contact your local Resene ColorShop or Reseller.**

**Do not use as a curing membrane on surfaces to be painted.**

**Be PaintWise**

**Quick check**

Use more: Brush, roller (high solids sleeve) or squeegee (flat surfaces only).

Gloss level: Satin.

Application rate: Two coats at one square metre per litre per coat. Additional coats may be required to achieve this spreading rate, especially on vertical surfaces.

Dry time (minimum): 1-3 hours. Full dry 3-4 days.

Do not apply at temperatures below 10°C or when temperatures are liable to drop below this during the drying period. Drying is slowed by thicker coats, low temperatures and high humidity.

The larger the proportion of the surface skin can vary that very small applications can take a very long time to dry through.

**Primer required:** Typically not required.

**Application method:** Brush, roller (high solids sleeve) or squeegee (flat surfaces only).

Thinning: Do not thin.

Clean up: Clean with water while wet. Once dry, use Resene Thinner No.2.

Colour: Brown when wet, black when dry. Recommended for non-aesthetic areas of buildings.
