RESINE WINTERGRADE QUICK DRY WATERBORNE PRIMER

**SAFETY PRECAUTIONS**
Read label before use. Keep out of reach of children. Harmful to aquatic life with long lasting effects. Toxic to aquatic life.

**PRECAUTIONS**
DO NOT EAT, DRINK OR SMOKE WHEN USING THIS PRODUCT.
Store in original or correctly labelled container, tightly closed, in a well ventilated indoor area, away from foodstuffs, at an ambient temperature and avoid freezing conditions. Avoid release to the environment.

**FIRST AID**
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. If eye irrigation persists get medical advice or attention.

IF SWALLOWED: Rinse mouth. Call a POISON CENTRE, doctor, physician or first aider if you feel unwell.

IF ON SKIN (or hair): If skin irritation occurs get medical advice or attention.

IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing. If exposed or concerned get medical advice or attention. When seeking medical advice take this container with you. Further information can be obtained from

AUST: POISONS INFORMATION CENTRE 131 126
call Resene 1800 738 383.
NZ: NATIONAL POISONS CENTRE 0800 POISON (764 766) or call Resene 0800 737 363.

For use as a preparation over undercover bases.

For full technical instructions see Data Sheet D812.

**Surface Preparation**
Ensure substrates are in sound condition, dry, free from dirt, dust, loose material, oil (including mineral oil based wood finishes or similar) and salt.

- Resene accumulated blowdown salt by washing with Resene Paint Prep and Housewash (see Data Sheet D812).
- Washblasting is the best surface preparation prior to painting of weathered cementitious surfaces.
- If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80).
- Efflorescence on masonry must be treated (see Data Sheet D83).
- Wherever oil and grease are present, the surface is thoroughly cleaned using Resene Paint Prep and Housewash. Flush clean with water.
- Fill cracks and holes in timber after priming.
- Round all sharp timber edges. Any bare timber surface that has been left exposed to the weather for more than one week must be thoroughly sanded or treated with Resene TimberLock (see Data Sheet D48).
- Existing gloss enamel painted surfaces must be thoroughly sanded to provide a key for subsequent coats.
- Not recommended for use where severe water staining exists or as a first coat over metal surfaces.
- All sanding dusts may be harmful and appropriate protection must be worn. In particular dusts from old lead or chrome based paints or old building materials containing asbestos may be injurious to health if inhaled or ingested. Seek expert advice if the presence of these materials is suspected.
- Exposed bare or cracked timber usually accumulates blowdown salt. Before using a totally waterborne system, this salt must be removed by prolonged washing with clean water. Alternatively, use a solventborne undercoat.
- Papercased plasterboard, fibrous plaster, and their stopings should be primed (e.g. Resene Broadwall - see Data Sheet D403).
- Woodboard must be sealed (e.g. Resene Sureseal - see Data Sheet D42 or Resene Waterborne Smooth Surface Sealer - see Data Sheet D46a) to prevent flow of the topcoats. Use Resene Sureseal if the surface is water stained.
- Some soft papercased plasterboard preparatory products and undercoated gypsum based stoppings may not be suitable basecoats for painting under stressed conditions.

Reinforcement with a saturation coat of a fully penetrating primer (such as Resene Sureseal or Resene Waterborne Smooth Surface Sealer) may be required. Use Resene Sureseal if the surface is water stained.
- This product may be used to paint a wide variety of surfaces. If the surface you propose to paint is unsound or not referred to, try a small test area first or contact your local Resene ColorShop or Reseller for advice.

**Application**
- Apply one or two coats of Resene Wintergrade Quick Dry allowing at least four hours between coats. Lightly sand between coats.
- On porous surfaces thinning with up to 10% clean water may be necessary.
- Maintain good ventilation throughout the drying and curing period to ensure the paint is properly cured. Poor ventilation may inhibit curing and performance.

**Overcoating**
- White wood primers require a minimum of two full topcoats to be applied.

**Be PaintWise**
For tips on responsible disposal of paint, cleaning equipment and minimising the impact of your decorating on the environment see the Resene website. Do not discharge any paint into the environment. Resene PaintWise (NZ) or paintback.com.au (Australia) accepts residual unwanted paint and packaging. Or contact your Local Authority for disposal information.

In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.

Manufactured under a quality system certified to comply with ISO 9001 by Telsar, an Accredited Certification Body. This product complies with the requirements of an APAS Paint Specification. Refer to the APAS Specification on the Resene website for full details. Printed on environmentally responsible paper, which complies with the requirements of environmental management systems ISO 14001 and 504001, using vegetable-based inks.

**Quick check**

**Use on:** All interior and exterior surfaces including timber and especially Matai, Spotted Gum and Totara, wallboards (fibre and particle board), sound cementitious surfaces, suitably sealed wallpaper and cloth and woven wall hangings.

**Gloss level:** Sheen.

**Coverage:** 12.5 square metres per litre per coat.

**Dry time:** (minimum): 4-6 hours. Dependent upon atmospheric conditions. Application outside this temperature range may affect curing and application properties. Do not apply at temperatures below 3°C or when temperatures are liable to drop below this during the drying period.

** Recoat time:** (minimum): 4 hours. Recoat when first coat is tough enough to resist the pressure of a firmly pressed, twisted thumb.

**Primer required:** Dependent on surface.

**Application method:** Brush, short pile synthetic fibre roller, speed brush or spray. It is not recommended that the first coat is sprayed.

**Colour:** White

**Before use:** Stir well with a wide flat stirrer.

Enjoy the Resene Promise of quality on premium paints. See your Resene ColorShop or the Resene website for a copy.

In every case it is recommended that the appropriate Data Sheet and Safety Data Sheet are consulted prior to application.

**Please ensure that the use of this product is compatible with the substrate and surface preparation method and that the colour in this container is the same as selected. When using multiple packs of this product on the same project please mix them together before use. Resene does not accept any responsibility for the application of incorrect product to substrate or the application of incorrect colours. Resene products are designed to be used as a system for optimal results. Substitution may yield nonstandard results or system failure. For further painting advice and information, call 1800 738 383 (AUS), 0800 737 363 (NZ) or visit the Resene website.**
