Resene Woodsman Whitewash is an exciting way of achieving a whitewash effect on new or weathered exterior timber. This product can also be used to achieve a greywash effect, which can be used on its own or as an intermediate coat before a fine paint finish. 

Preparation: 

- Varnish, stain or paint all existing surfaces before applying Resene Woodsman Whitewash. 
- Do not apply under damp conditions. 
- Remember that any residue is removed by freshen washing and clean water.
- Use Resene Timber and Deck Wash (see Data Sheet D813) is recommended for all substrates to remove dirt, contamination and loose cellulose fibres. 
- Ensure surfaces to be stained are dry, free from dust, dirt and contamination. 
- Apply Resene Woodsman Whitewash immediately after cleaning to ensure the cleanliness of the substrate is maintained. 

Application method: 

- Apply by airless spray or brush. 
- A surrounding area of approximately 250mm from the treated surface should be covered with plastic sheeting to prevent overspray. 
- Resene Woodsman Whitewash is applied in two coats. 
- The average coverage rate is 1st coat, 3-4 square metres per litre, 2nd coat, 10-12 square metres per litre. 
- Do not thin. Clean up with water when wet or mineral turps when dry.

Thinning and clean up: Do not thin. Clean up with water when wet or mineral turps when dry.

Additional greywash effects can be achieved by using a tinted paint system. 

Not suitable for use on:

- White metals. 
- Packaging materials or its coatings. 
- Erosion control. 
- Dust suppressant. 
- Items to be painted white. 
- Water based finishes. 
- Glass or Perspex. 

Colors available:

- Whitewash 
- Light greywash 
- Mid greywash

Precautions: 

- Contains powerful fungicides. 
- Do not paint over existing paint finishes. 
- Keep out of reach of children. 
- Do not allow entry to the environment.

For use as a decorative/protective coating. 

For full technical instructions see Data Sheet D57W. 

AUST: POISONS INFORMATION CENTRE 131 126 

Contact your Resene ColorShop or Reseller for advice on the actual timber you are staining. 

If exposed or concerned, get medical advice or attention.

If inhaled: Remove to fresh air and keep at rest in a position comfortable for breathing.

If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do so. Continue rinsing. If eye irritation persists get medical advice or attention.

If in contact with skin: Wash with clean, soapy water. If redness, swelling or irritation occurs get medical advice or attention.

If in contact with clothing: Remove clothing. If necessary, wash clothing separately from other laundry.

For immediate attention to skin contact, call Resene 1800 738 383 or visit the Resene website. 

Additional greywash effects can be achieved by using a tinted paint system. 

Quick check

Use on: Timber surfaces. 

Gloss level: Semi. Fully penetrating over bare timber. 

Tinted timber: 1st coat, 10-12 square metres per litre, 2nd coat, 1-2 square metres per litre. 

Rough sawn timber: 1st coat, 4-6 square metres per litre, 2nd coat, 9-11 square metres per litre. 

Dry time (minimum): 45 minutes. Drying is shown by loss temperatures and high humidity. Do not apply under damp conditions. 

Recycle time (minimum): 2 hours. 

Prime recycled: 1: 2, primer recycled: 1: 3. 

Usual number of coats: Two. Will require maintenance after four to six months. 

Application method: Brush or rollers. 

Thinning and clean up: Do not thin. Clean up with water when wet or mineral turps when dry. 

Use with Resene Stain Calculator to determine the minimum number of coats required for various substrates. 

Carries a label under the Australian Coat of Arms indicating that it complies with Noise Pollution Control Act 1960.
