Resene X-200 is an acrylic weatherproof membrane incorporating the latest European membrane technology and designed to be both easy to use and cost effective. It is ideal for use as a decorative/protective coating on appropriate projects to assist with heat reduction and reduce heat related stress on the environment. If using a Resene CoolColour, try a small area first or contact your Resene staff whether a Resene CoolColour is right for your project. Enjoy the Resene Promise of quality paints. See your Resene ColorShop or the Resene website for your nearest location.

**Preparation**

- **Surface Preparation**
  - Ensure that surfaces to be coated are in sound condition, dry, free from dirt, dust, loose material, oil and grease.
  - Remove accumulated windblown salt by washing with Resene Paint Prep and Housewash (see Data Sheet D812).
  - Oil and grease must be removed using Resene Paint Prep and Housewash (see Data Sheet D812).
  - Remove accumulated windblown salt by washing with Resene Paint Prep and Housewash (see Data Sheet D812).
  - Concrete blocks and rougher surfaces require three coats of Resene Sureseal to ensure weathertightness. Brush or roller are the preferred methods of application over blocks and flat surfaces. If using multiple packs of this product on the same surface, make sure that the colour in this container is the same as selected. Data Sheet and Safety Data Sheet are consulted prior to application. 
  - Ensure substrates to be coated are in sound condition, dry, free from dirt, dust, loose material, oil and grease.
  - Ensure the presence of these materials is suspected.
- **Exterior Surfaces**
  - Oil and grease must be removed using Resene Paint Prep and Housewash (see Data Sheet D812).
