Resene X-300E
high build elastomeric membrane
waterborne exterior/interior

WARNING
Use as directed by the manufacturer. Causes mild skin irritation. Causes eye irritation. May cause sensitisation by prolonged contact. May cause sensitisation by inhalation. Harmful if inhaled. Harmful if swallowed. Read label before use. Keep out of the reach of children. If exposed or suspected of exposure, seek medical advice immediately. Avoid breathing spray or mist. Avoid contact with skin, eyes or clothing. 

PRECAUTIONS
• For new applications, ensure that the area is sealed off from foot traffic and rain. 

Airless spray - use a L TX 523 tip and a unit such as a Graco 523 FS spray gun.

Application
Due to its unique rheology, Resene X-300E may be applied at very high thicknesses without sagging or film cracking. 

• Use airless spray for high build finishes on non-porous surfaces such as render, brick and concrete. 
• Use a LTX 523 tip and a Graco 523 FS spray gun. 

Application under cold conditions will affect sag resistance and film formation. The minimum recommended wet film thickness of the applied Resene X-300E must be a minimum of 30 microns. Due to regional variations in concrete block standards, the application of Resene X-300E to concrete blocks will depend upon the sleeve used. If required the surface texture can be reduced by back rolling using a Resene No.4 sleeve. 

Priming
ConcreteSeal 3 in 1.

Adhesive
Resene X-300E can be used as an adhesive for bond sealing of low bonds such as render and brick. 

ColorShop or Reseller for advice. 

Brush coats of Resene Brushable Crack Filler (see Data Sheet D811). Efflorescence on masonry is easily removed by rinsing off with diluted Resene Paint Prep and Housewash. If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80). Efflorescence on masonry and Housewash. Cleaning may be enhanced by the addition of cleaning equipment and disposing of unwanted 
The presence of these materials is suspected.
