**Resene X-400**

**ultra high build barrier membrane**

**waterborne exterior/interior**

**Use**

For use as a decorative/protective coating.

**Composition**

- Waterborne acrylic copolymer emulsion
- Ground calcite (white)
- Aluminium white pigment
- Middle range sand and flint for body
- Fine sand for body and texture

**Gloss level**

Matte

**Application method**

Suitable for application by spray, brush or roller.

**Usual number of coats**

2

**Dry time (minimum)**

- 1 hour between coats
- 24 hours before recoating

**Recoat time (minimum)**

- 4 hours

**Drying**

At least 4 hours after the application of each coat.

**Surface preparation**

- ConcreteSeal 3 in 1.

**Sealants**

- Resene X-400 is a thixotropic ultra high build weathertight barrier membrane and is part of the Resene High Performance Coatings Systems EMAS and ISO14001, using vegetable-based inks.

**Application**

- Priming

- Sealing

- Priming

- Covering

- Coating cracks

- Coating whole areas

**Cleaning Paint Equipment**

Suitable for cleaning when fresh paints are being used. Use a solvent-based detergent. Suitable for washing spray guns only if compatible with the paint being used.

**Cleaning Tools**

- Clean spray equipment by soaking in a solvent-based detergent solution. Remove the trigger before filling the spray gun with detergent. Use detergent designed for spray equipment.

**Safety**

**Read label before use. Keep out of reach of children.**

**Precautions**

- Harmful to aquatic life with long lasting effects. Avoid release to the environment.

**First Aid**

- In the presence of these materials is suspected. Health if inhaled or ingested. Seek expert advice if poisoning suspected.

**Disposal**

- Metallic containers, glass bottles and plastic packs may be discarded in the normal waste stream. Shrink wrapped plastic/foil pack material is to be landfilled or incinerated. Do not contaminate any water supply.

**Storage**

- Store in original or correctly labelled container, tightly closed, in a cool, dry place.

**Waste disposal**

- Remove accumulated windblown salt by washing with water. Use of these materials is suspected. Health if inhaled or ingested. Seek expert advice if poisoning suspected.

**Technical data**

- Net contents: 4 litres

**Resene X-400 Laboratory Test Data**

- Thickness: 795 microns
- Coverage: 10m² / 5L
- Drying time: 4 hours
- Hardness: Full
- Rapid: 3 months
- Solids: 20% w/w
- pH: 7.0
- Odour: Mild
- Acidity: Meets all relevant standards
- Odour: Meets all relevant standards
- VOC: Meets all relevant standards
- Colour: Matches all relevant standards
- Heat resistance: Meets all relevant standards
- Cold resistance: Meets all relevant standards
- Flexibility: Meets all relevant standards
- Alcohols: C11-15 secondary Ethoxylated <10 gms/L
- Surfactants: 40 gms/L, Alcohols C11-15 secondary Ethoxylated <10 gms/L.
