WARNING
• All equipment and methods should be clean to prevent contamination of the paint. 

PRECAUTIONS
• Do not allow paint to come into contact with the skin.
• Do not use this product if it is unsuitable for the use intended.
• Do not inhale paint fumes.

SPILLS
• Neutralize with water. Do not cause vomiting. Get medical advice without delay.

FIRST AID
• For use as a decorative/protective coating.

General
• Material Safety Data Sheet (MSDS) is available and must be consulted before use.
• In a case it is recommended that the current Resene Data Sheet is consulted for product data, application guidelines and surface preparation information.
• This product comprises a Base and Hardener, which should be mixed in the required ratio using an air or explosion-proof power mixer. Mix each component separately before blending them together. Add the total contents of the Base container to the total contents of the Base container. Once uniformly mixed, allow them to stand for the recommended induction time prior to re-mixing and use.
• This product comprises a Base and Hardener, which should be mixed in the required ratio using an air or explosion-proof power mixer. Mix each component separately before blending them together. Add the total contents of the Base container to the total contents of the Base container. Once uniformly mixed, allow them to stand for the recommended induction time prior to re-mixing and use.
• Thinning requirements may vary according to application method, equipment and environmental conditions.
• Thinning is required after components have been blended and thoroughly re-mix using the power mixer.
• Ensure correct wet film thickness is applied to achieve desired dry film thickness. Allowance must be made for any thinner added.
• Use of incorrect thinner may have adverse effect on application and performance.
• Drying is affected by low temperatures and low humidity.
• Clean prior to painting.
• Following appropriate preparation, all surfaces must be dry and clean prior to painting.
• This product may be used to paint a wide variety of surfaces. If the surface to be painted is unsound or not referred to, consult your local Resene ColorShop for your nearest Technical Representative.
• Formerly Resene Inorganic Zinc Silicate Two Pack.

Engineered Coating Systems

Zincilate 10 Powder

- For full technical instructions see Data Sheet RA20.
- In every case it is recommended that the current Resene Data Sheet is consulted for product data, application guidelines and surface preparation information.
- Material Safety Data Sheet (MSDS) is available and must be consulted before use.
- This product comprises a Base and Hardener, which must be mixed in the required ratio using an air or explosion-proof power mixer. Mix each component separately before blending them together. Add the total contents of the Base container to the total contents of the Base container. Once uniformly mixed, allow them to stand for the recommended induction time prior to re-mixing and use.
- Thinning requirements may vary according to application method, equipment and environmental conditions.
- Thinning is required after components have been blended and thoroughly re-mix using the power mixer.
- Ensure correct wet film thickness is applied to achieve desired dry film thickness. Allowance must be made for any thinner added.
- Use of incorrect thinner may have adverse effect on application and performance.
- Drying is affected by low temperatures and low humidity.
- Ensure that the mixed product is used within the stated pot life. Higher temperatures will reduce the pot life, conversely lower temperatures will increase it.
- The temperature of the substrate should be 7˚C above the "Dew Point." 
- The "Dew Point" requirement can be presumed to be satisfied if a thin clearly defined film of water applied to the cleaned surface with a damp cloth evaporates within 15 minutes.
- Follow appropriate preparation; all surfaces must be dry and clean prior to painting.
- This product may be used to paint a wide variety of surfaces. If the surface to be painted is unsound or not referred to, consult your local Resene ColorShop for your nearest Technical Representative.
- Formerly Resene Inorganic Zinc Silicate Two Pack.
