Resene Zylene Sheen Zero is the result of advanced technology that produces a smooth yet tough surface. Drying to an attractive low sheen finish, its ease of application, washability and durability make it an ideal choice for interior use. A very low odour product with no added volatile organic compounds (VOCs).

Preparation:
- Surfaces to be painted are in sound condition, thoroughly cleaned with a light detergent, dry free from dust, dirt or incrustation.
- If paint is peeling, test for paint bond with Resene Sureseal or Resene StainLock (see Data Sheet D807), Resene Broadwall 3 in 1 (see Data Sheet D810) prior to application of Resene topcoat paints.
- Efflorescence on masonry should be treated (see Data Sheet D83).
- Where staining is present the source must be removed.
- If mould is present, treat with Resene Moss & Mould Killer (see Data Sheet D80).

Application:
- Apply coats in the recommended thickness allowing at least two hours between coats. For full technical instructions see Data Sheet D302.

CLEANING PAINT EQUIPMENT:
- Efflorescence on masonry should be treated (see Data Sheet D83).
- Oil, grease, fly spots and incrustation should be removed using either a stiff brush or a white spirit (ALCOHOL) or when suitable a solvent-free sugar soap or sugar soap brush. Clean with water.
- Always cleaning is present the surface must be removed.
- Fill cracks and holes in interior walls before sealing.
- All sanding dusts may be harmful and appropriate protection must be worn. In dusty conditions, wear a face mask.

SPILLS:
- Avoid release to the environment. Do not discharge any paint into the environment. Do not pour any paint into drains.
- For tips on responsible disposal of paint, cleaning equipment and temporary storage see the Resene Caring for your paint finish brochure or the Resene website for a copy.

SAFETY PRECAUTIONS
- Read label before use. Keep out of reach of children.
- This material is quite liquid, with vapours that may cause irritation. Harmful if inhaled.
